General Benefits

Aloe vera juice contains nineteen amino acids, twenty minerals and twelve vitamins, making it an excellent natural food supplement.

Drink daily from 30 to 90 ml. Aloe Vera juice provides many health benefits. It helps dilate capillaries and support cell growth by improving circulation, regulates blood pressure, promotes healing of bones and joints, heals internal tissue damage and ulcers, strengthens the immune system, improves and even eliminates constipation, defends body against bacteria, helps to regulate blood sugar, aid in the healing of psoriasis by reducing the itching, and also provides a sense of wellbeing and energy.

Benefits of weight loss

Reduce and stabilize the body mass index, stimulating the liver cells to burn more energy. Energy from fat and carbohydrates that our body stores.

Energy consumption increases our body

Because of its high protein content of collagen, aloe vera juice drink each day, the body has to expend additional energy to assimilate protein collagen in your system.

Accelerates and improves our digestion

Aloe Vera also reduces the amount of time food remains in the intestine, which means it absorbs less energy from food. Scientifically proven, the use of aloe vera regulates the digestive system, and in general, solves almost any anomaly related to it. Consequence of the above, strengthens the immune system.

Usage

We recommend a daily intake of 30 to 90 ml., In three doses of 10 to 30 ml (2 tbsp), 15 minutes before breakfast, lunch and dinner.

Conservation

Once opened it should be kept in the refrigerator, being a 100% natural.
